	Description	Child Nutrition Programs is using this opportunity to update our out of date program database/ for CNPweb which is our system designed for applications and renewals, as well as claims for reimbursement associated with the Child Nutrition Programs operated within the State of Utah. We will be applying to convert our current system from an obsolete ASP computer language to ASP.net which provides a more secure system with the added benefit of increased functionality, such as a comprehensive ability to perform program reviews, that will allow for increased efficiencies and effectiveness for both our staff and program sponsors for program compliance.
